

# K-6 Technology Improvements

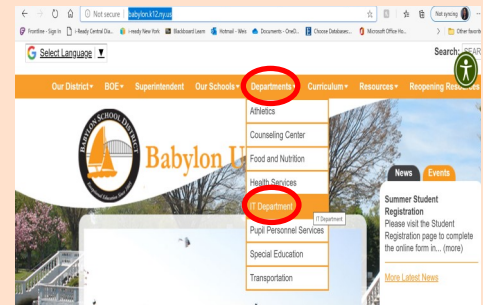

## TEAMS

- ◇ Teams will continue to be used as the central hub for virtual instruction.
- ◇ Special area teachers and student support services/teachers will have their own individual Team as opposed to a channel within the classroom teacher's Team.
- ◇ Teachers will be in full control of when a live video session starts and ends. Students will not be able to enter a live video session without the teacher being present.
- ◇ All students will now be visible on screen during a live video session on Teams. This new Gallery View will simulate a traditional classroom feeling.

## TECHNOLOGY SUPPORT

- ◇ Visit the Districts Technology Resource Page for Software User Guides, Updates and Support by going to <http://babylon.k12.ny.us/>
- ◇ Click on Departments, then IT Department

- ◇ The [IT Support Form](#) will continue to be available for parents and students experiencing a technology issue. This link and future technology updates will also be available in the weekly Newsletter.

## GENERAL TECHNOLOGY IMPROVEMENTS

- ◇ Students will be given a four-digit pin number to sign into their devices. This will make the process of signing in quicker and easier. \*More details to follow.
- ◇ Documents will now be saved automatically to students' OneDrive. This will keep all student work in one location.

## WINDOWS UPDATE REMINDER

Windows Updates will be pushed out to student laptops weekly. It is recommended that students check for updates every **wednesday**.

Steps to run windows updates:
